

LURA-FLEX™ OPEN END OFFSET INNERSPRING

LURA-FLEX™... is perhaps the best Offset design spring system available. Each coil flexes independently for more sensitivity to body contours, and more durability with less friction. Lura-Flex™ is more comfortable than normal Offsets; with no border sag or coil feel.

Features Include:

- Consistent coil diameter; coil barrel is even and untapered for firm support.
- 100% working wire, every part of the surface flexes.
- Open, unknotted coils are more flexible and sensitive to body contours.
- Smaller coil diameter creates greater surface coverage than normal Offsets.
- Designed in edge support; the barrel of each coil is positioned under the border rod for support right up to the edge.
- Clipped borders for firm edge support.

- We supply and control the high quality of our wire product from our own wire mills.
- Coast to coast distribution.
- Representatives servicing your area.

Leggett & Platt is ISO 9000 Compliant and LP 9000 Certified.

The **Active Support Technology™** of **innersprings** allow your muscles to relax in a more natural sleep position. The **coils adjust instantly** to your sleep movements, **comforting and supporting** your body actively as you dream on.
