

SEMI-FLEX™ Low, Std, and High Profiles

SEMI-FLEX™...Leggett & Platt is now offering three height options to its already popular SEMI-FLEX™ one-piece rigid steel design foundation.

- Now available in High, Medium and Low Profile.
- The unique grid/leg assembly is very efficient, firmer, durable and noiseless.
- Low and Std., available in 10 ga., High Profile, available in 9 ga., extra heavy grid wire for unsurpassed strength and durability.
- Reinforced grid adds surface coverage and enhances stability.
- Heavy duty 3 ga. border rod is welded and wrapped to the grid for maximum edge firmness and no side sway.
- Very fast efficient assembly to 5 slat frame.
- A complete one-piece steel foundation with no separate components.
- Utilizes Stack Rack reusable packaging.
- The Semi-Flex design allows better tailoring at the corners adding to the eye appeal of the entire unit.
- Passes all durability tests including Cornell, Rollator and Impact.
- We supply and control the high quality of our wire product from our own wire mills.
- Coast to coast distribution.
- Representatives servicing your area.

• **Semi-Flex High Profile 7"**
